Softaculous Installer

One-click install for WordPress, Joomla, Drupal, and 150+ other scripts.

LiteSpeed Servers

Up to 9x faster than standard Apache, with 50% faster PHP processing.

R1Soft Backups

Automated daily backups accessible directly from cPanel.

24/7 Support

Reach our team via ticket, live chat, or email whenever you need help.

Which plan is right for you?

Standard covers the essentials for a single site or blog. **Platinum** doubles the storage and adds room for up to 10 addon domains — a solid middle ground for anyone managing more than one site. **Unlimited** is built for developers and agencies hosting several client sites on one account. Every tier runs the same LiteSpeed infrastructure and cPanel control panel — only capacity changes between plans. Hosting multiple client websites under separate accounts, or reselling hosting as a business? See our Reseller Hosting plans on the next page.
